The application has been amended as follows:

Claim 43, line 1, "wherein said is formed" has been changed to read "wherein said means is formed".

3. The following is an examiner's statement of reasons for allowance: The art of record considered as a whole alone or in combination neither anticipates nor renders obvious, a fastener, having at least one inner surface adapted to cooperate with the at least one inner segment, so that when a tool is applied and the nut is turned by the tool to overcome a thread friction with the rod and the rod wants to turn along while a holding force holds the body stationary, the at least one inner segment stops the rod from turning so that any further turning of the nut elongates or relaxes the rod in an axial direction to tighten or loosen the rod by elongating or relaxing the rod, together in combination with the rest of the limitations set forth in the dependent claims.
